ABOUT THE COURSE

A one-day course that provides an introduction to economic evaluation in health and health care. The course includes:

- An introduction to economic concepts and the health technology assessment framework
- An overview of economic outcomes including utility-based quality of life
- Estimation of total costs with a focus on routinely collected data
- Calculation of cost effectiveness
- A discussion on the use of economic evaluations in the policy process including the Pharmaceutical Benefits Advisory Committee

No prior knowledge of economic evaluation is required
