

NHMRC CLINICAL TRIALS CENTRE

A Flagship Centre of Excellence in Clinical Trials
at the University of Sydney.

ABOUT US WHO WE ARE

The NHMRC Clinical Trials Centre (CTC) is a flagship centre of excellence in clinical trials research at the University of Sydney. We design and deliver trials related research, including coordination, monitoring, data acquisition and management, and statistical analysis. Our health economics, biostatistics, systematic reviews, and biomarker teams work with trial data and inform healthcare providers about best practice.

FIVE YEAR SNAPSHOT 2018 - 2022

- +130 active trials
- +300 active sites globally
- +25,000 participants recruited
- +60 students graduated (PhD & Masters)
- +900 peer reviewed publications
- CTC publications have 3.4 times the impact of comparable publications (Field weighted citation index from 2016-2021 is 3.39)**

EXPERIENCE

Established in 1988, we have over 34 years of experience working with national and international partners to solve problems of public health importance.

EXPERTISE

We are focused on advancing the science and methodology of trials. We have the expertise to work across multiple therapeutic areas and cutting edge study designs.

IMPACT

Our research is delivering excellence in trial conduct that addresses unmet clinical needs in human health, impacting future clinical practice and policy.
